

# Sandhills Science Fair 2019 - Thursday, March 7

Starting at a very young age, we learn through play and experimenting to see “what if...?” This year, many curious students have completed either research projects or experiments. On Thursday, March 7 these projects will be displayed and judged during our annual Science Fair. The schedule for the day will be as follows:

**8:55 am - 9:00 am** - Set up in the gym

**9:00 am - 10:15 am** - Judging (gym closed to visitors)

**10:35 am - 12:00 pm** - Display boards open for viewing in the gym. Teachers are free to take their classes to see the displays.

**12:50 pm - 1:20 pm** - Science Fair Assembly (teacher led demonstration/experiment followed by presentations to all Science Fair participants). Projects receiving the highest scores will be announced and will continue to the divisional Science Fair.

Parents are welcome to attend the assembly and stay afterward to view the projects.

**1:20 pm** - Participants take down their boards.

Students continuing on to the Divisional Fair can store their project at the school.
